

**Creating environmental  
business opportunities**

**EnviroBusiness has extensive experience of assisting public sector organisations to achieve their goals in relation to environmental industries, infrastructure and innovation. We can help create new economic activity, stimulate innovation and employment.**

**Public sector buyers seeking environmental solutions**

- Identification of opportunities to procure environmental technology, products and services
- Development of procurement initiatives and programmes
- Risk assessment of technologies and training of procurement officers
- Expert input to tender assessments of environmental technology, products and services suppliers
- Identification and facilitation of dialogue with potential suppliers

**Regeneration agencies**

- Determination of environmental enterprise opportunities in relation to local circumstances
- Engaging environmental businesses as tenants and infrastructure suppliers
- Provide expert knowledge and support to professional advisers

**Innovation organisations**

- Development of innovation partnerships with businesses, research organisations and universities
- Delivery of funding processes: design, tender invitation, assessment, contracting and monitoring
- Assessment of tenders for collaborative R&D or other innovation funding applications
- Coordinating with regional, national and international funding programmes

**Government organisations supporting environmental**

- Feasibility assessment of delivery options in relation to markets and economic circumstances
- Detailed planning of business support and enterprise delivery programmes

## **industries**

- Link and coordinate with regional, national and international stakeholders and initiatives
- Facilitation of business/sectoral engagement and network building
- Facilitation of public-private collaboration and dialogue
- Manage and mitigate state aid regulations
